

Sam I am

Connecticut was the silicon valley of the 19th century. Home of Sam Clemens & Sam Colt.
Past Vision and Prosperity that carried us through the 20th century will not carry into the 21st

How did we lose our way?

Success has a downside. Success brings disengagement.

We have lost leadership ourselves and thus for Connecticut.

We must always Advocate for Growth.

Growth in human capital always precedes economic growth

Our Sam Values:

Value local leadership

Value local work

Value local business people & entrepreneurs as the solution

We need business leaders who are willing to communicate to save Connecticut

Are focused on running a high performance business?

Willing to listen and understand public policy issues facing Connecticut?

Are you adding more trust into society while growing business?

What is the next step? - Find places to talk - SAM talks
Society, Advancement, Money

Talk to each other about developing people we know.

How can we help each other with talent?

Talk to each other about investing in new ideas.

Can we help each other with introductions?

Talk to each other about market solutions to public policy.

Will you communicate with your legislator?

Have you considered running for public office?

Have you considered being appointed to public positions?
